DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 9, 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yuen et al (US 6,477,705 B1).

Claim 9:

- a) the claimed "a first decoder for decoding the broadcast video signal" is met by Fig. 1 item 13;
- b) the claimed "a second decoder for decoding the text information signal" would have been obvious to an artisan at the time the invention was made, because it is well known to provide text information signal in television broadcast signal and for further processing the text information signal an artisan would have readily recognized that the text information signal would have to be decoded or extracted from the television broadcast signal;
- c) the claimed "a first compositor for composing the text information signal decoded by said second decoder and a predetermined display screen signal so as to create a program guide signal" is met, for instance, by Figs. 3, 9 item 46 where program guide signal is created as claimed;

Art Unit: 2614

d) the claimed "a first compressor for compressing the broadcast video signal decoded by said first decoder so as to output a first compression video signal" would have been obvious to an artisan at the time the invention was made, because Yuen is capable of displaying multiple picture signals on different screen portions of a monitor (see for instance Fig. 3 for evidence), so for displaying video signal on a screen portion of the monitor an artisan would have readily recognized that the video signal would have to be compressed to fit the screen portion of the monitor;

- e) the claimed "a second compressor for compressing the program guide signal created by said first compositor so as to output a second compression video signal" is obvious to an artisan for the same reasons as part d) above;
- f) the claimed "a second compositor for composing the first compression video signal and the second compression video signal such that a broadcast video and a program guide are displayed on different screen portions of a monitor" is met, for instance, by Figs. 3, 9 where a broadcast video (item 42) and a program guide (item 46) are displayed on different screen portions of a monitor as claimed.

Claim 2 is met, see Fig. 1 items 28, 24, 19, col. 7 lines 35-40.

Allowable Subject Matter

- 3. The indicated allowability of claims 9 and 2 is withdrawn in view of reinterpretation of the reference of record to Yuen et al (US 6,477,705 B1). A new final rejection based on the reference is presented above.
- 4. Claims 3-8 are allowed.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean W. Désir whose telephone number is (703) 308 9571. The examiner can normally be reached on 5/4/9 - First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W. Miller can be reached on (703) 305 4795. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
